

Trishes.

On the Celebes Sea, off southern Mindanao, June 11, 1904, many small, fat flyingfishes were seen throughout the day.

June 12, 1904, many flying-fish were noted in the Gulf of Davao, southern Mindanao. One flew a distance estimated at 500 yards by Governor Bolton and myself.

There are no fish in streams of Mount Apo as high as Todaya (4000 feet), not even very small ones, the Bagobo natives told me.
